DearBUP: A Campus Social Network

INTRODUCTION

A website application for blogging that is exclusively available for the Bicol University-Polangui community. It blends the interactive traditional social networks like Facebook, Instagram, Reddit, and X(formerly Twitter) with a unique digital letter system designed for emotional expression. By creating a space that strengthens the personal storytelling and institution updates inside BU Polangui, it aims to build a bridge between students, campus organizations and the university administration.

System Purpose

The primary purpose of DearBUP is to provide a safe, engaging, and centralized digital platform and environment for BU Iskolars, specifically in Bicol University-Polangui, and it seeks to;

- Offer a single website or hub for department and organization announcements and updates.
- Provide tools for students to share their thoughts, confessions, and appreciation through creative digital media.
- Allow for student honest feedback regarding school services through moderated anonymous account channels.

Target Users

1. **Students.** primary users who will share letters, react to posts, and track campus events.
2. **College Based Organizations.** promote activities, manage dedicated pages, and track event engagement.
3. **University Departments/Offices.** post official announcements and gather student feedback.

Key Features

- **Expression** - Users can create customized digital letters with design options and integrated Spotify tracks to add deeper meaning to their messages.
- **Dedicated CBO Directory** - Org Portal where users can browse a list of all recognized campus organizations. Each CBO has a dedicated profile page showing their upcoming event updates.
- **Activity Tracker** - Dedicated Events Button to see a chronological calendar or list of all upcoming activities.
- **Campus News Feed** - Secondary social space for real-time interaction (Likes, Comments, and Shares) to keep the community engaged between major events.
- **Student Feedback System** - Accessible channel for students to submit suggestions to departments and organizations.
